

Heat Pump Water Heater – Reduce your water heating cost by up to 60%

With a new heat pump water heater, you get the same reliable hot water while using up to 60% less energy. Get more control with a digital control panel that allows users to easily set operation modes to maximize energy savings.

- Reduce water heating cost by up to 60%
- Most units have additional controls, such as temperature and away settings
- Learn more at hotwatersolutionsnw.org

INCENTIVE INFORMATION

Lane Electric offers two options to help you make the switch to a heat pump water heater:

- \$200 TIER 1 QUALIFIED UNIT**
- \$400 TIER 2 & 3 QUALIFIED UNIT**

Tier 1, 2 & 3 product information can be found on our Qualified Product List available at www.laneelectric.com.

State and federal tax credits may also be available for residential efficiency upgrades. Additional restrictions may apply. Visit the Oregon Department of Energy and energystar.gov for more information.

ELIGIBILITY

- Home is an existing residence located within LEC's service area.
- The installed Heat Pump Water Heater ("equipment") must be on the Northern Specification Qualified Products List.
- Equipment replaces an existing electric storage water heater.
- This application must be completed within 90 days of the date of purchase (as specified on your receipt/invoice).
- Participant is authorized to make home improvements.

REQUIREMENTS

- Participant authorizes LEC to conduct quality inspections to ensure program specifications are followed.
- Equipment installed to manufacturer specifications, including:
 - There is adequate clearance to remove the air filter
 - Earthquake strapping is installed
 - Installation complies with local code
 - Condensate line slopes to a drain or exterior location
 - Temperature/pressure relief valve installed/operational
- Participant understands and accepts the unit's maintenance requirements, safety instructions, and expected cooling effect and noise levels in installation area.

STEPS TO PARTICIPATE

We can help you identify savings opportunities, find retailers or contractors, and ensure compliance with program requirements.

1. Call Lane Electric to confirm eligibility for the program and determine if a heat pump water heater is right for you.
2. Contact a participating contractor or retailer to install or buy your qualifying unit or go to hotwatersolutionsnw.org
3. Proceed with your installation.
4. Submit your project rebate application for final approval and rebate payment.
5. Enjoy your new efficient product and start planning your next project!
