

LANE ELECTRIC'S SOLAR WATER HEATING INCENTIVE PROCESS

Below are the steps required in order to receive incentives for a solar water heating system through Lane Electric:

1. **PROPOSAL** - Provide a proposal (copy of contractor's proposal) including:
 - a. System design information (including a sun chart)
 - b. Any equipment cutsheets that are available
 - c. Cost estimate
2. **PROPOSAL REVIEW** - Lane Electric will review the proposal and get back to you with any questions
3. **AUTHORIZATION** – After the project is reviewed you will be given an authorization for the incentive
4. **SYSTEM INSTALLATION** – once you have been notified that the project has been authorized you may coordinate with the contractor to have the system installed
5. **INSPECTION** - A scheduled inspection of the installation will be made by a Lane Electric Energy Services Representative once the installation is complete
6. **FINAL PAPERWORK** - Final paperwork is submitted to Lane Electric including:
 - a. Final contractor invoice (or receipts if it is a home owner installation)
7. **INCENTIVE PAYMENT RELEASED** - Program incentives will be paid provided all necessary requirements have been met and all paperwork is received

*Lane Electric's current solar water heating program incentive is \$500
